Special Issue

Environmental and Ecological Determinants of Infectious Disease Emergence

Message from the Guest Editors

Global change is shaping ecological and environmental conditions that alter the dynamics of infectious diseases. Shifts in disease ecology are a threat to public, wildlife and livestock, through the emergence of zoonotic diseases from which the majority of emerging infectious diseases are originated. We invite authors whose featured works will align with the broader scope of the journal to directly address challenges including, but not limited to, the following themes:

- **Global Change Drivers:** Impacts on the risk patterns of zoonotic diseases
- **Pathogen Ecology and Evolution:** Environmental influences, survival, transmission dynamics, virulence, and the evolution of antimicrobial resistance
- **Ecological Interfaces and Zoonotic Spillover:** Pathogen transmission at the human–wildlife–livestock interface
- **Surveillance and Prediction:** Development and application of artificial intelligence, machine learning, and remote sensing for disease mapping, warning systems, and risk forecasting
- **One Health:** Integrated approaches linking environmental health, wildlife conservation, and human well-being in the context of disease management.

About the Journal

Message from the Editor-in-Chief

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne
Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya
Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.2 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2026).
